Since 1871, Ecore has been creating unique products that make people’s lives better. What started with simple cork closures has evolved into a diverse portfolio of products solving complex problems in applications ranging from playgrounds, weight rooms, and turf fields to hospitals, hotels, and retail environments. We are building our company and the products we offer based on the simple notion that floors should elevate beyond current expectations. Our energy is focused on the interaction between people and the surface, and today, we work to support every person, in every space, every day.

From the very beginning, we’ve challenged ourselves with one simple question:

Can a floor do more?
Yes.

We believe that a floor is more than just a passive surface. It must work with the human body to provide support and sustain the ability for individuals to do what they love—longer. Your flooring should go beyond your expectations; it should benefit those who interact with it. At Ecore, we engineer performance well beyond industry standards and, through technology and innovation, are driven to provide solutions for challenges that real people face every day. Our goal is not just to provide flooring, but to provide flooring solutions that improve the lives of people across every segment of the population in every life.
Ecore is dedicated to fully understanding the relationship between people and the surfaces they work, play, and live on... and how we can contribute MORE. Safety, ergonomics, and acoustics are our core areas of opportunity to create dynamic surfaces that are catered to the individual and the specific application.

To understand our company, you have to embrace the idea that

Yes is More.
The Promise of Safety

A floor does MORE when elderly patients have shorter and safer hospital stays, with fewer falls that lead to broken bones. A surface provides MORE when a commitment to safety lets us watch our child drop from the playground monkey bars, only to get up and try again. And when rubber surfacing responds to the constant cadence of a recreational runner’s footfalls on the track with the same dedication to safety as it has toward the intermittent releases of the weightlifter’s deadlift, that’s MORE. A floor must do MORE to help people safely work, heal, and live life to the fullest.

Featuring Infinity Rx
A floor does MORE when a doctor stands focused through a challenging 8-hour surgery without the distraction of joint or lower back pain, or a healthful curator navigates museum galleries for years, fueling the worldly aspirations of generations of students.

A floor does MORE when a nurse, a pharmacist, or a chef completes a 10-hour shift and still has the energy to go home to play with his children without leg or back pain. It does MORE when smart, ergonomically supportive rubber surfacing contributes to the overall health of a baby boomer by helping her maintain a daily strength and conditioning routine.

A floor must do MORE to help people comfortably work, stay fit, and live healthy and productive lives.

Featuring ECOrx
The surfing in a school does MORE when it contributes to a teacher’s effectiveness by providing a calm and quiet learning environment. A floor does MORE when it reduces hospital noise, softens footfall, and helps each patient heal by fostering tranquility for rest and recovery. When multiple surfaces converge in a busy gym, each doing its part to mitigate noise, the flooring contributes to an environment MORE conducive to an optimal workout for each fitness buff. And for the family enjoying “vertical living” in 2B, a floor does MORE when they’re never bothered by the family with three dancing toddlers, two big dogs, and a music-loving teenager living in 3B. A floor must do MORE to help preserve people’s quiet as they work, heal, stay fit, and enjoy their home.
Find your perfect Flooring Solution.

By bringing ergonomics, safety, and acoustical attributes together in expert proportions, we create tailored surfaces that make people’s lives better and sustain their ability to do what they love longer.

Rx is a collection of premium flooring products developed and manufactured to meet the extreme challenges experienced in commercial environments, including healthcare, senior living, hospitality, and education facilities. With any Rx product, you will experience a floor that is more quiet, more ergonomic, and more safe. Leveraging Ecore’s patented iStru technology, Rx products provide force reduction and energy restitution in every step.

**Dimensions**
- Rolls: 7mm (2mm + 5mm) x 72” (1.83m) x 30 linear feet (9.14m)

**Force Reduction**
- Absorption of impact energy: 11.5%

**Energy Restitution**
- Useful return of impact energy: 72.0%
Pennsylvania Presbyterian Medical Center

Philadelphia, PA

The Challenge.

It took three years to create a new trauma center for the Pennsylvania Presbyterian Medical Center (PPMC). This premier medical center treats thousands of life-threatening injuries every year, and it was crucial to design a facility that would benefit patients, staff, and healthcare providers.

PPMC had many challenges to address, including maximizing sound absorption for increased rest and privacy and minimizing impact on joints for hardworking staff. The floor also had to be durable, easy to clean, and able to withstand the weight of patient beds and other equipment without permanent indentations. And, of course, it had to look great.

Our solution: Forest Rx.

The design team selected 5,000 square yards of Forest Rx for patient bays, treatment areas, corridors, and nurses’ stations. Forest Rx uses Ecore’s patented itstru technology, which fusion bonds a composition rubber backing to a vinyl surface, making it ergonomic, quiet, and safe. The material lowers the impact of force from falls by an impressive 11.5 percent.

The number of colors available allowed the team to choose high-contrast pops of color to help decrease patient and visitor anxiety, and to differentiate between staff, patient, and family zones. Forest Rx is as quiet as carpet, reducing impact sound more than 20 decibels.
Strait Rx

Modern finishes pair with ergonomic qualities for comfort and calm.

Strait Rx provides a unique flooring solution for healthcare, senior living spaces, fitness facilities, and any area expecting heavy commercial use. Available in 6-foot-wide rolls, this product features 5mm of Ecore’s composition rubber backing fusion-bonded to a contemporary, modern heterogeneous vinyl sheet from Polyflor. This combination creates a surface that reduces the risk of injury associated with falls and offers sound control and comfort underfoot. The high-quality, cross-linked polyurethane reinforcement (PUR) provides a low cost, polish-free maintenance regime for the lifetime of Strait Rx.

Infinity Rx

Harmonious shades blend together to create a softer, more organic appearance.

Drawing influence from traditional textiles and woven floor coverings, each of these linear patterns is composed of harmonious beige, gold, and brown shades all blended together, eliminating the use of hard lines to create a softer, more organic appearance. Available in 6-foot-wide rolls, this product features 3mm of Ecore’s composition rubber backing fusion-bonded to a contemporary, modern heterogeneous vinyl sheet from Polyflor. This combination creates a surface that reduces the risk of injury associated with falls and offers sound control and comfort underfoot.

Cosmos Rx

Subtle highlights add depth and movement that changes with the light in the room.

The minimal effect created by these smooth, neutral floor coverings marries beautifully with both traditional and contemporary interiors. The subtle highlights created by the pearlescent fragments within the design give the floor added depth and movement that changes with the light in the room. Available in 6-foot-wide rolls, this product features 5mm of Ecore’s composition rubber backing fusion-bonded to a contemporary, modern heterogeneous vinyl sheet from Polyflor. This combination creates a surface that reduces the risk of injury associated with falls and offers sound control and comfort underfoot.

For more than 25 years, ECOsurfaces composition rubber flooring has offered a diverse portfolio of flooring patterns that make a distinct design statement without sacrificing the health of the natural environment. ECOsurfaces offers architects and designers endless possibilities to create personalized designs for a multitude of markets. All ECOsurfaces products are FloorScore® certified to qualify for use in high performance schools and office buildings. ECOsurfaces products also have the potential to contribute towards earning points for LEED certification.

The original innovator in recycled rubber surfacing creates exactly the look you envision.

Ecore pioneered the use of composition rubber in commercial applications more than 25 years ago. Versatile, durable, and made with recycled content, this 4-foot-wide rubber flooring is ideal for all commercial environments. Standard in 3.2mm thickness, ECOsurfaces product options include traditional roll goods, square edge tiles, interlocking tiles, and custom thickness options. ECOsurfaces absorbs energy, vibration, and noise. The result is a product that has evolved from a novelty of the sustainability movement into a staple in the interior landscape.

The Challenge.

During the design of the nearly 500,000-square-foot San Diego Central Library, it was clear that the typical linoleum floor wouldn’t be enough to house the 1.26 million-piece collection. Between books, art features, a large auditorium, a 3-story reading room, a multipurpose room, a teen center, a children’s room, a technology center, and an outdoor garden courtyard and café, the library is a true community treasure.

As an educational and public space, the design had to maintain the library’s commitment to keeping students, library patrons, librarians, and visitors safe. The right flooring material would also absorb shock from footsteps and help maintain a quiet atmosphere. Beyond all that, the floor had to look great and stand up to countless footsteps for years to come.

Our solution: ECOsurfaces Classic.

With 1,500 square feet of ECOsurfaces installed on each floor, the library is more than just safe, quiet, and ergonomic—the use of color also gives each floor its own unique identity.

In a space that has such a wide variety of uses and so many different types of people using it, ECOsurfaces is a durable choice that absorbs shock and sound while minimizing the chance that anyone will slip and fall. It gives students and library regulars peace and quiet while providing staff peace of mind.
ECOfit

Ready to take on the most extreme workout for those serious about fitness.

ECOfit is designed for bodies in motion. Whether it’s a traditional health and fitness application or a very active work environment, ECOfit provides ample sound and shock absorption and comfort underfoot with a focus on dynamic energy return. By utilizing Ecore’s patented Itstru technology, a standard ECOsurfaces 3.2mm surface layer is fusion-bonded to a composition rubber backing, providing comfort, support, and versatility. This 8.2mm engineered floor provides enhanced performance, while mitigating fatigue and the risk of injury.

3.2mm Composition Rubber
5mm Base Layer
ECOrx is designed to go beyond anti-fatigue mats by creating a full ergonomic floor for people working on their feet. Engineered with the perfect balance of force reduction and energy restitution, ECOrx absorbs impact force while returning energy and encourages people to stand on the balls of their feet, preventing compression in the back and legs. By utilizing Ecore’s patented itstru technology, ECOrx features a standard 3.2mm surface layer fusion-bonded to a composition rubber backing, resulting in a 15.2mm product. ECOrx is available in glue down rolls and adhesive-free interlocking tiles.

Create a safe and enchanting outdoor living or play space.

Rugged and durable, ECOmax is a square, beveled tile featuring a patented footed system. The 1-inch molded tile is designed specifically for use in weight rooms, while the 2.5-inch version is designed for play areas or rooftop patios. Able to withstand the rigors of dropped free weights in a weight room or wear and tear on a rooftop patio, ECOmax provides enhanced acoustical performance by dampening the transmission of noise. ECOmax also offers superior drainage, continuous under-foot comfort, and tested slip resistance to prevent falls and injuries.

Interlocking Tiles
8mm x 23" (58cm) x 23" (58cm)
ECOsurface Collection

ECOsmash

Unparalleled sound and shock absorption in multi-level fitness facilities.

This 2-foot by 2-foot by 2.5-inch molded composition rubber tile is designed for areas where extreme durability and ultimate sound and shock absorption are required. ECOsmash eliminates the shock and sound resulting from weights being released onto its surface by absorbing the impact. ECOsmash is the perfect compliment to platform style weight lifting.

Markets
- Corporate
- Education
- Hospitality
- Multifamily
- Public Buildings

Benefits
- Easy installation with Quad Blok installation system
- Superior sound and shock absorption
- Withstands heavy weight impacts
- Slip resistant
- Meets ADA standards
- Patented “Ultra” high-density wear layer

Color Options
(Shown in standard colors. Available in other ECOsurfaces colors as non-standard. Visit ecorecommercial.com.)

**Pinnacle 2**

Soft surfaces that balance durability and comfort.

Pinnacle 2 features Ecore’s patented Illtru technology. A non-woven carpet wear layer is fusion-bonded to an Ecore composition rubber backing. The result is a product that provides a prescription for comfort and superior performance characteristics.

**Markets**

**Notes:**
- **Colors:** Various colors available for each product.
- **Rolls:** Available in standard sizes.
- **Tiles:** Rectangular tiles in different sizes.
- **Planks:** Wood-like planks for aesthetic appeal.
- **Activity Rooms:** Suitable for high-traffic areas.
- **Bank:** Ideal for commercial banking environments.
- **Bathroom:** Perfect for bathroom installations.
- **Corridor:** Suitable for corridors.
- **Clinic:** Suitable for healthcare settings.
- **Hospital:** Designed for hospitals.
- **Library:** Ideal for libraries.
- **Locker Room:** Suitable for locker rooms.
- **Meeting Room:** Perfect for meeting rooms.
- **Office:** Suitable for office environments.
- **Waiting Area:** Ideal for waiting areas.
The AttainSilence System combines the varied look of Attain and the reliable performance of ECOsilence for one warranted system that provides an ideal solution to the acoustical challenges in your environment.

Attain

A collection of luxury vinyl tiles designed for a wide range of commercial applications.

Attain products were developed to meet the aesthetic and maintenance challenges faced in hospitality, multifamily, and other commercial environments.

**Markets**
- Corporate
- Education
- Healthcare
- Hospitality
- Multifamily
- Public Buildings
- Retail
- Senior Care

**Benefits**
- Workhorse for traditional commercial applications
- Durable
- Slip Resistant
- Easy to install

---

### Attain 2.0
This traditional glue-down LVT is ideal for light to moderate traffic in residential and multifamily applications. At 2.0mm in thickness with an 8mil wear layer, this value-oriented option is well-suited for less demanding applications.

### Attain 2.5
At 2.5mm thick and boasting a 20mil wear layer, this product represents our workhorse for traditional commercial applications and moderate to heavy trafficked multifamily and hospitality applications.

### Attain 4.2
At 4.2mm thick with a 20mil wear layer and featuring an interlocking click system, this product represents an ideal option for challenging multi-family and hospitality applications because it requires no adhesive to install.

---

**Dimensions**

- **Wood Planks**

ECOsilence

Underlayment that meets acoustical needs of diverse environments.

ECOsilence is a flat, resilient underlayment used directly under most floor finishes. It yields exceptional results even under hard surface flooring and over concrete and wood joist construction. ECOsilence offers many performance benefits. Installers can thin-set ceramic and porcelain tile directly to it per ASTM C627, it’s compatible with most floor finishes, and it can be installed quickly.

Compared to other underlaminents, ECOsilence performs better. Five millimeter (mm) ECOsilence stands up better than 12mm cork per ASTM E2179.

Markets

- Education
- Corporate
- Multifamily
- Public Buildings
- Retail
- Hospitality
- Senior Care
- Healthcare

Benefits

- Compatible with most floor finishes
- Made from composition rubber
- Exceeds IIC requirements
- Adheres to IAQ standards and building costs
- Lifetime warranty
- Maintains a low profile

So, can a floor make people’s lives better?

Yes.

A floor can be more than just a passive surface. By harnessing the attributes of recycled rubber, we’ve designed innovative ways to give you:

**ERGONOMICS**
Making people more productive and comfortable in their environments.

**SAFETY**
Managing impact and surface hazards better than ever before.

**ACOUSTICS**
Reducing noise in and between functional spaces.

Bringing these attributes together in expert proportions, we’ve created tailored surfaces that make lives better, while also protecting the planet.

This is Ecore’s definition of **SUSTAINABILITY**

Can a floor make people’s lives better in their environment, while simultaneously benefiting the natural environment?

Yes.

Ecore | Built by Yes.
